Course:
CSC-102 Programming Fundamentals

Department of Computer Science
University of Engineering and Technology
Lahore Pakistan

Vision of 1st Year

Business application

I want to develop a **Payroll Application** .By which employees may get to know their income, tax, gross salary etc.

Some features to be added:

- Users have to enter their information to get the calculated amount
- The output will be salary after taxes
- The users can also check for their payed-holidays.

2D Game

I want to develop **a Space Shooter** game. I have always been interested in this game. I would like to hone my programming skills by developing this game.

Some features to be added:

- Player will only get 5 lives
- There will be increase in level difficulty
- Player can only move horizontally while enemies may move vertically also.
